**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 7<sup>th</sup>, 2006 has been entered.
2. Claims 10, 12-13, 15-26 are under consideration in this application.
3. Claims 11, 14 and 22 are being cancelled without prejudice or disclaimer.
4. Claims 10 and 15-21 are being amended.
5. New claims 23-26 are being added.

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:  
  
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
7. Claims 20, 21 and 23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 3621

8. The basis of this rejection is set forth in a two prong test of."

(1) whether the invention is within the technological arts; and

(2) whether the invention produces a useful, concrete and tangible result.

For a claimed to be statutory, the claimed invention must be within the technological arts.

9. Mere ideas in the abstract (i.e., abstract idea law of nature, natural phenomena, software product) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" and therefore are found to be non-statutory subject matter. For a method claim to pass the muster, the recited method must somehow apply, involve, use, or advance the technological arts. In the present case the inventive concept in claims 20, 21 and 23 only recite an abstract idea. The recited steps do not apply, involve, use or advance the technological arts since all the steps can be performed in the mind of the user or by use of pencil and paper and no specific technology (e.g. computer, processor) is expressly recited in the body of the claims. In re Toma (CCPA 197 USPQ 852 ('1978)).

10. Although the recited method produces a useful, concrete and tangible result, since the claimed invention, as a whole, it not within the technological arts as explained above, for it only claim a software product and there is no specific technology with the product. Therefore, claims 20, 21 and 23 are directed to non-statutory subject matter.

*Allowable Subject Matter*

11. Claims 10, 12-13, 15-19 and 24-26 allowed.
